

**CHAPTER 2
PROBABILITY**

2-1. Objective and subjective.

2-2. An event is a set of basic outcomes of an experiment. The union of two events is the set containing all basic outcomes that are either in one event or in the other, or in both. The intersection of two events is the set of basic outcomes that are members of both events.

2-3. The sample space is the universal set pertinent to a given experiment. It is the set of all possible outcomes of an experiment.

2-4. The probability of an event is a measure of the likelihood of the occurrence of the event. When sample points are equally likely, the probability of the event is the relative size of the set comprising the event within the sample space.

2-5. The union $G \cup F$ is the event that the baby is either a girl, or is over 5 pounds (of either sex). The intersection $G \cap F$ is the event that the baby is a girl over 5 pounds.

2-6. The union is the event that the player scores in the game with A, or in the game with B, or in both. The intersection is the event that the player scores in both games.
