The next exciting Biochemistry news for 2017 is Nup98 Protein. In a new study, the blood cell maturation mechanism was elucidated, and how they differentiate into specialized cells.This research was found to be mediated by a protein called Nup98, which functioned as a control point for the movement of molecules from the nucleus.Also, the mechanism that disrupts this process to give way to the ...

Top 14 Biochemistry News In 2017 - Biology News

In the 19 th Century, a prevailing belief was that protoplasm, the jelly-like inside of the cell, carried out all of the processes involved with breaking down food molecules.It was believed that the chemistry of living organisms was inherently different from that of non-living ones. In 1897, Eduard Buchner performed an experiment that would change this view.
