5g Le And Wireless Communications

The future of wireless communication is 5G. 5G wireless technology promises a rich, reliable, and hyperconnected world. But from new bands to wider bandwidth and new beamforming technology, 5G New Radio (NR) presents significant design and test challenges. Find a number of 5G related resources made available by National Instruments below.

The ongoing deployment of the fourth generation (4G) of wireless mobile systems has prompted some telecommunication companies to consider further development towards fifth generation (5G) technologies and services. Since the appearance of the first generation (1G) system in 1981, new generations have emerged approximately every 10 years.
