Atlas of Psoriasis (Encyclopedia of Visual Medicine Series ...

*Psoriasis is a common autoimmune skin disease characterized by T cell-mediated hyperproliferation of keratinocytes. The disease has a strong but complex genetic background with a concordance of approximately 60% in monozygotic twins, and recent linkage and high resolution association studies indicate that HLA-Cw*0602 is itself a major susceptibility allele for psoriasis.*

Immunopathogenic mechanisms in psoriasis

Psoriasis is an autoimmune skin disease, that can be lifelong if lifestyle and environmental factors are not adjusted. Psoriasis, though an inflammatory skin disease, is a topical manifestation of what is also occurring inside the body (Pagano, J.O.A., 2008).
