the STC, which consists of a flight manual supplement (FMS) and a revised airspeed placard for the crew station.

Textron Inc - Useful Load on Bell 206B3 Jet Ranger Increased

Actually knowing the manufacturers reasonably well and from first hand experience - I can say yes it did. In my opinion (and of course it is only in my opinion) the manufacturers should be much more reasonable in sharing some publications such as the RFM or other pertinent publications which would aid in the safe operation of

The Bell 206 is a family of two-bladed, single- and twin-engined helicopters, manufactured by Bell Helicopter at its Mirabel, Quebec, plant. Originally developed as the Bell YOH-4 for the United States Army's Light Observation Helicopter program, it was not selected by the Army. Bell redesigned the airframe and successfully marketed the aircraft commercially as the five-place Bell 206A JetRanger.
