If you already know what you are looking for, search the database by author name, title, language, or subjects. You can also check out the top 100 list to see what other people have been downloading.

Canon T70 T 70 Camera

The Canon T70 was a 35mm FD-mount single-lens reflex camera introduced in April 1984 as the second in Canon's T series.The T70 started with the concepts explored in 1983's T50, took them further, and applied them to a more sophisticated camera.While the Program AE-only T50 was intended as a beginner's camera, the T70 gave the photographer a lot more control over the camera's operation while ...

The Canon T70 was a 35mm FD-mount single-lens reflex camera introduced in April 1984 as the second in Canon's T series. The T70 started with the concepts explored in 1983's T50, took them further, and applied them to a more sophisticated camera.

Amazon.com : Canon T70 Film Camera With A Standard 50mm f ...

The T70, along with the T50, began the computerized camera era for Canon. The T70 is among Canon's last manual-focus cameras. Canon started with a clean slate when they came out with the EOS autofocus cameras. The T70 may be primitive and cryptic compared to modern cameras, but used by itself, it does what it needs to with simplicity.

Canon T70 - Ken Rockwell

Although the T70 was a quantum advance in camera technology than the first T-series model, the all programmed-AE-only T-50, the basic concept of the T series model remains - advanced doesn't mean complicated, simplicity in control and operation are the order of the day. The T70 was delightfully simple to use. With a streamlined compact design.

About Canon Camera Museum. Canon Camera Museum is a virtual museum that was first opened on 30 September 1996. Not only does it provide historical information, such as the history of Canon (History Hall) and descriptions about all cameras and lenses released since it

Canon Camera Museum - Canon Global

In 1984, Canon released the second camera in the T-series, the T-70. The kit included an FD 35-70mm f/3.5-4.5 lens or an FD 28-55mm f/3.5-4.5. It used a vertical-travelling, electronic focal plane shutter, offering shutter speeds from 2s - 1/1000s. Like its predecessor, and all the Canon cameras that would follow, it had a built-in auto winder.
