Study Guide Answers: Blood and the Cardiovascular System

Together, these data suggest that the cardiovascular system is indeed a valid therapeutic target for CBD. However, the target sites of action for CBD remain to be established for most of these responses. Whether these responses to CBD will translate into the human cardiovascular system also remains to be established.

Is the cardiovascular system a therapeutic target for ...

The cardiovascular system consists of the heart, blood vessels, and the approximately 5 liters of blood that the blood vessels transport. Responsible for transporting oxygen, nutrients, hormones, and cellular waste products throughout the body, the cardiovascular system is powered by the body's hardest-working organ - the heart, which is only about the size of a closed fist.

STUDY GUIDE

The blood moving through the circulatory system puts pressure on the walls of the blood vessels. Blood

Read Book Cardiovascular System Blood Vessels Study Guide

pressure results from the blood flow force generated by the pumping heart and the resistance of the blood vessel walls. When the heart contracts, it pumps blood out through the arteries.

Blood Vessels | Circulatory Anatomy

Blood Vessels are often compared to a system of pipes with liquid circulating in them, but this analogy is only a starting point. Unlike pipes, blood vessels are extremely dynamic structures that constrict, relax, pulsate, and proliferate. In this article, we'll examine the structure and function of these important circulatory pathways.
