I'm not sure when Cat changed from head studs to bolts, both my K's had spacer engines with head bolts and my H had studs. The older D342 engines with studs would sometimes be very hard to remove the head from the studs. If the engine had been together for a long time the head would be stuck to the studs.

In 1955 two all-new D8s, with a brand new engine, were introduced. These were the D342 powered D8E and D8F (14A series) manual transmission with oil clutch (the 'E' became an 'F' when oil-cooled steering, clutches and brakes were introduced) and the D8G (15A series) manual transmission with torque converter drive.
