Single-step methods (such as Euler's method) refer to only one previous point and its derivative to determine the current value. Methods such as Runge-Kutta take some

intermediate steps (for example, a half-step) to obtain a higher order method, but then discard all previous information before taking a second step. Multistep methods attempt to gain efficiency by keeping and using the ...

A software project is not only concerned with the actual writing of software. Infact, where a software application is bought "off the shelf " , there may be no software writing as such, but this is still fundamentally a

software project because so many of the other
activities associated with software will
still be present.
