Clinical Neurology of Aging | Neurology

In their preface to the second edition, the editors state, "Our goal has been to shape a comprehensive text-reference book of the neurology of aging providing the scientific foundations of clinical practice, together with practical clinical advice for diagnosis and management of neurological disorders in the elderly patient."

Clinical Neurology of Aging | JAMA | JAMA Network

Most hospital services have found that the average age of their patients, regardless of specialty, has risen dramatically in the last five to ten years. In fact, as a practitioner of neurology, I find that to see a patient younger than age 65 years has become the exception rather than the rule.

Objective To test the hypothesis that the inflammatory marker plasma soluble CD14 (sCD14) associates with incident dementia and related endophenotypes in 2 community-based cohorts. Methods Our samples included the prospective community-based Framingham Heart Study (FHS) and Cardiovascular Health Study (CHS) cohorts. Plasma sCD14 was measured at baseline and related to the incidence of dementia ...

Most scientists who study aging do so by studying older adults. That makes perfect sense, but Denise Park, PhD, isn't most scientists. Park, who heads the Aging Mind Laboratory at the University of Texas at Dallas (UT Dallas), combines neuroimaging techniques and behavioral research to study the aging process across the life span.
