The interdisciplinary master of science/master of engineering in construction engineering and management at the University of Colorado Denver prepares the next generation of construction engineers with the requisite set of skills to be effective leaders and managers within this ever-evolving industry.

Construction engineering and management

An emphasis in construction management is available in either option. For students who have a strong interest in the construction of commercial buildings, architectural engineering provides the combination of engineering, architectural design and building systems as a foundation for entering the commercial construction industry.
