CPT® 53600 in section: Dilation of urethral stricture by ...

Urethral stricture dilation is a common treatment method for smaller strictures that measure one centimeter or less in length. The urethral stricture dilation treatment consists of a urologist progressively stretching the stricture using a series of dilators that gradually increase in size.

Urethral Stricture Dilation, Stent & DVIU | Reconstructive ...

Urethral dilation and DVIU have similar long-term outcomes in short strictures, with success ranging from 35-70%. 76-78 The success of endoscopic treatment depends on the location and length of the stricture, with the highest success rates found in those with bulbar strictures less than 1 cm. 79-81 Conversely, success rates for dilation or DVIU of strictures longer than 2cm are very low. ...

Urethral Stricture Guideline - American Urological Association

September 19, 2017. Dealing with sub-meatal urethral stricture: meatoplasty and dilation (related: fossa navicularis strictures) Note: my surgery was for Rigid Cystoscopy and Optical Urethrotomy (direct visual internal urethrotomy – DVIU).. EVEN IF MY SURGEON HAD DONE A DVIU DURING RADICAL PROSTATECTOMY, THIS ISSUE WOULD HAVE REMAINED A LIFELONG ISSUE

Dealing with sub-meatal urethral stricture: meatoplasty ...

In females, meatal stenosis can usually be treated in the physician's office using local anesthesia to numb the area and dilating (widening) the urethral opening with special instruments. In boys, it is treated by a second surgical procedure called meatotomy in which the meatus is crushed with a straight mosquito hemostat and then divided with fine-tipped scissors. [6]

Meatal stenosis - Wikipedia

Coders also sometimes misuse CPT code 52341, cystourethroscopy with treatment of ureteral stricture (i.e., balloon dilation, laser, electrocautery, and incision). If a physician puts a stent in and dilates the urethra to make it easier to insert the guide wire, coders may be tempted to assign CPT code 52341, but this is incorrect.

2020 ICD-10-CM Diagnosis Code N35.9: Urethral stricture ...

What is a urethral stricture? Urethral stricture is a narrowing of the urethra. Your urethra is the tube that carries urine from the bladder through the penis and out the urethral meatus (the opening at the tip of the penis) during urination. Many men with a stricture will have increasing discomfort with urinating and a slowing of the urinary stream.
