These are just a few of the events that are likely to befall Earth and human civilization in the next 100,000 years. And it will be the choices we make in this century that will affect that future more than any previous generation. We are living at the dawn of the Age of Humans; the only question is how long that Age will last. PRAISE FOR DEEP ...

Deep Future: The Next 100,000 Years of Life on Earth ...  
"While most of our attention in the field of climate science has focused on what we might expect by the end of the 21st century, Curt Stager takes us to a time 100,000 years in the future. This intriguing and thought-provoking view of the far future is an essential read for all interested in the full force of climate change.

Summary and reviews of Deep Future by Curt Stager  
Book Review: Deep Future: The Next 100,000 Years of Life on Earth by Curt Stager. He suggests that a public inability to look beyond the short term and a tendency for people to exaggerate the dangers of climate change has done more harm than good for the cause to save the planet. This isn't that hard to believe.
