### Die Cutting And Tooling A

The die-cutting and tooling process is among the most critical areas of label converting and finishing. The sophisticated technology it uses enables the production of quality die-cut and converted labels and their application to multiple surfaces, using a wide variety of substrates, on many different presses.

### Die-cutting and Tooling: A guide to the manufacture and ...

A Cutting Die – Tooling Used for Custom Boxes These dies are composed of metal strips called “rule”. The rule is sharpened for cutting through the paperboard (or chipboard or corrugated fiberboard) or left slightly dull for scoring areas used for the closing flaps of the folding carton for example, and any other areas where the box will naturally fold.

### Tooling for Packaging Part One - The Cutting Die

Thermoforming tools. Cutting dies. For flat and rotary die-cutting. Of paperboard. And corrugated board. Plastics. And much more. Technologies for highest performance.
