rotor drones to be controlled by beginner pilots.

Drones - dummies

If you plan to fly a drone, you need to understand how it is controlled. For an object that is heavier-than-air to get airborne, you must create lift. Lift is a force that pushes an object upward into the air and is created by varying the air pressure above and below an aircraft. Airplanes create [...]

Understanding How Your Drone Is Controlled - dummies

Quadcopters are by far the most popular multi-rotor drones. Drones can also be further classified by; Range; Close-range: Most close-range drones usually have a range of around 4-5 km (3 miles) and can stay in the air an average of 20-30 minutes. My drone, DJI Mavic Pro, have a range of 7 km and the new Mavic 2 up to 8 in clear conditions. Short-range: Most short-range drones can be controlled ...
