The RF180C communication module was developed to connect the SIMATIC RFID readers to an S7 control system via PROFINET. The “Ident” S7 program blocks are used to control the readers. The basic example for this solution is kept very simple. It focuses on describing the basic steps for configuring and programming the automation solution.

WinCC: S7-1200 SIMATIC HMI Basic Panels (KTP)
One of the great advantages of these Starter Kits is the included HMIs and the software used to program them. All the SIMATIC HMIs can be integrated in any new or existing project in TIA Portal. In the software the HMI part is so well integrated, that it just seems too easy to start working with HMIs.
