Farming Cuba: Urban Agriculture from the Ground Up | ArchDaily

Cuba has an enormous potential when it comes to agriculture. René Dumont, a well-known French agronomist, once said, "with proper management, Cuba could adequately feed five times its current population." As it stands, Cuba can't even feed its own population.

Cuban Agriculture & Farming Economy - Anywhere

Havana's urban farming expanded massively after 1989, when the collapse of the Soviet Union led to a sudden oil shortage – a critical problem given Cuban agriculture's dependence on oil – and monetary shortfalls. The onset of food shortages, with resulting undernourishment and malnutrition, led to Cuba's rapid adaptation to non-oil-dependent agriculture, including urban agriculture.

Havana urban farming | WWF

While Havana's urban agriculture has taken on many forms, ranging from private gardens (huertos privados) to state-owned research gardens (organicponicos), Havana's popular gardens (huertos populares) are the most widespread and accessible to the general public. Popular gardens are small parcels of state-owned land that are cultivated by individuals or community groups in response to ongoing food shortages.

Urban Agriculture in Havana Cuba - City Farmer

Agriculture in Cuba. Today, it contributes less than 10% to the gross domestic product (GDP), but it employs about 20% of the working population. About 30% of the country's land is used for crop cultivation. The inefficient agricultural industry in Cuba has led to the need to import large amounts of beef and lard.

Agriculture in Cuba - Wikipedia

The collapse of the Soviet Union forced Cuba to become self-reliant in its agricultural production. The country's innovative solution was urban organic farming, the creation of 'organoponicos'.

Cuba's organic revolution | Environment | The Guardian

Urban agriculture is part of Havana's official master plan, and farms are often located prominently in major parks. The state provides free land to farmers and subsidizes access to tool, seeds, starts and planting material.
