Hematite ( $\text{Fe}_2\text{O}_3$ ) thin films with different thicknesses are fabricated by the rf magnetron sputtering deposition. The effects of film thicknesses on the photocatalytic activity of hematite films have been investigated. Hematite films possess a polycrystalline hexagonal structure, and the band gap decreases with an increase of film thickness.

Thickness Dependent on Photocatalytic Activity of Hematite ...

The Journal of Plastic Film and Sheeting is a peer-reviewed journal devoted exclusively to the research, development, and processing of plastic film and sheeting. Reports by specialists from industry and universities present new developments in polymer science and plastics technology that result in improved films and sheeting ...

Journal of Plastic Film & Sheeting: SAGE Journals

Thin Solid Films is an international journal which serves scientists and engineers working in the fields of thin-film synthesis, characterization, and applications. The field of thin films, which can be defined as the confluence of materials science, surface science, and applied physics, has become an identifiable unified discipline of scientific endeavor.

Wrinkling modes are determined for a two-layer system comprised of a neo-Hookean film bonded to an infinitely deep neo-Hookean substrate with the entire bilayer undergoing compression. The full range of the film/substrate modulus ratio is considered from the limit of a traction-free homogeneous substrate to very stiff films on compliant substrates.

Wrinkling Phenomena in Neo-Hookean Film/Substrate Bilayers ...
