Frenchay Aphasia Screening Test (FAST) – STASS Publications

Aphasia is an inability to comprehend or formulate language because of damage to specific brain regions. This damage is typically caused by a cerebral vascular accident, or head trauma; however, these are not the only possible causes. To be diagnosed with aphasia, a person's speech or language must be significantly impaired in one of the four communication modalities following acquired brain injury or have significant decline over a short time period. The four communication modalities are audito
