The system can be controlled with both the wired and wireless remotes simultaneously (with some features restricted).

Fujitsu Wired Remote Control | HVACDirect.com

The Fujitsu's wired & Wi-Fi "thermostats" are really remotes, and don't automatically behave as thermostats. They have local temperature sensing on board, but the mini-split head will continue to use the sensor in the head until it's programmed to use the fixed remote's temperature sensor.
