The 2-ray ground reflected model may be thought as a case of multi-slope model with break point at critical distance with slope 20 dB/decade before critical distance and slope of 40 dB/decade after the critical distance. Using the free-space and two-ray model above, the propagation path loss can be expressed as

Two-ray ground-reflection model - Wikipedia
Communication in extension plays an important role in technology transfer, whereas many field extension workers are poorly trained in this particular area as well as in the development of educational materials. This publication was prepared as a teaching and learning guide to be used in the pre-service and in-service
