TCP/IP Network Administration (3rd Edition; O'Reilly ...

From 192 to 223, the default address mask is 24 bits long; the first three bytes are the network address, and the last byte is the host number. From 224 to 239, the address is multicast. The entire address identifies a specific multicast group; therefore the default mask is 32 bits. Greater than 239, the address is reserved.

To Tcp Ip Third Edition Answers - ibest9.com

TCP/IP uses a numeric addressing scheme in which each node is assigned an IP address that is used to route packets to a node on the network. Because it is much easier for people to remember names such as www.somedomain.com instead of 10.1.1.1, a protocol called Domain Name System (DNS) is used to map numbers to names, and vice versa.
