Power transmission can be precisely regulated. In extreme situations, it's even possible to send almost 100% of power to the rear. The general principle of the Haldex clutch is to always send the driving forces to the axle with the better traction. In this way, 4MOTION is able to respond swiftly and optimally to any driving situation.

I asked them to change the haldex, angle gear and rear diff fluids. The car has 85,000km. One of the slow witted mechanics thought that it would be a good idea to put 75w140 gear oil in the haldex. They also used the 75w140 for the angle gear and rear diff. Shortly after the fluid change I noticed that the haldex was leaking.
