Construction Planning, Equipment, and Methods CHAPTER ... Heavy equipment or heavy machinery refers to heavy-duty vehicles, specially designed for executing construction tasks, most frequently ones involving earthwork operations or other large construction tasks. Heavy equipment usually comprises five equipment systems: implementation, traction, structure, power train, control and information. Heavy equipment has been used since at least the 1st century BCE when the ancient Roman engineer Vitruvius described a crane in *De architectura* when it was power

Heavy equipment - Wikipedia

Construction is a general term meaning the art and science to form objects, systems, or organizations, and comes from Latin *constructio* (from *com-*"together" and *struere* "to pile up") and Old French *construction*. To construct is the verb: the act of building, and the noun construction: how a building was built, the nature of its structure.

Construction - Wikipedia
