The dignity of human procreation and reproductive technologies

Assisted reproductive technologies (ART) have challenged our thinking around what it means to be human. Associated with this is the dignity and humanity in a decision to become a parent, and how our genetic material is to be used. On the one hand we might claim a "reproductive right" as an expression of our personal autonomy and control over our bodies.

Assisted Reproductive Technologies and Human Rights ...

They do violence to the dignity of the human person. In America we have a tendency to think that we can solve all problems with the right "technology." But children are not engendered by technology or produced by an industry. Children should arise from an act of love between a husband and wife, in cooperation with God.
