Problem 3. Let $ABCD$ be a square, and let E and F be points on AD and BC respectively. The line through E parallel to BC and the line through F parallel to AD divide $ABCD$ into two squares and two nonsquare rectangles. The sum of the areas of the two squares is $\frac{1}{2}$ of the area of square $ABCD$. Find EF . Solution. It's important to note that EF is equivalent to AD . We define s as the length of the side of larger inner square, which is also s , as ...
