ISO 14644-5:2004 specifies basic requirements for cleanroom operations. It is intended for those planning to use and operate a cleanroom. Aspects of safety that have no direct bearing on contamination control are not considered in this part of ISO 14644 and national and local safety regulations must be observed.

possibility that some of the elements of this part of ISO 14644 may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. International Standard ISO 14644-4 was prepared by Technical Committee ISO/TC 209, Cleanrooms and associated controlled environments.

ISO 14644-4 E

The cleanroom classification standards FS 209E and ISO 14644-1 require specific particle count measurements and calculations to classify the cleanliness level of a cleanroom or clean area. In the UK, British Standard

ISO Standard Clean Room

Information

ISO 5 Cleanroom (Class 100)
In theory, for a classified
room (not just below a LAFW
hood) to reach ISO 5 air
cleanliness, you need to
enter the cleanroom via an
ISO 8 (ante-room), then go
through an ISO 7, followed
by an ISO 6 to finally get
into the ISO 5. In reality,
however, you can reach an
ISO 5 cleanroom with 2 or 3
airlocks.

Cleanroom Classifications

particulates and other
environmental conditions,
cleanrooms are certified to
a specific class, based on
the standard ISO 14644-1, or
similar standards. The room
must perform, according to
the standards, to meet or
exceed the ISO parameters to
maintain compliance.
