AudioPilot (Bose sound system) is noise compensation technology that continuously adjusts audio settings to compensate for background noise and vehicle speed. The enhanced DSP algorithm allows faster, more effective compensation for unusual situations, such as driving on very rough roads or at high speeds.

Mazda and BOSE® have never been obsessed with numbers. Instead, they focused on the overall experience. Mazda doesn't focus on horsepower, 0-60 times or audio system wattage. The automakers cares more about how the vehicle drives, how the system sounds and how the listening experience adds to the driving experience.

I got the Bose option and I am not satisfied. Bass is weak and if you turn it up to 6 on the head unit the door speakers start distorting very soon. Looking to replace the sub. Anyone have the factory repair/wiring manual? There is an amp under the passenger seat but I googled pics and it appears like those woofers are active units usually...
