Meeting the health care needs of an aging population will drive the costs of Canada ' s publicly funded health care system higher: the cost of health care for the average senior is about \$12,000 per year, compared with \$2,700 per person for the rest of the population. Federal health transfers to the provinces and territories do not currently

Meeting the Care Needs of Canada ' s Aging Population

As people age, their health needs tend to become more complex with a general trend towards declining capacity and the increased likelihood of having one or more chronic diseases. Health services are often designed to cure acute conditions or symptoms and tend to manage health issues in disconnected and fragmented ways, that lack coordination across care providers, settings and time.
