Enshare™ Datastream MP2 Gateway User's Guide

Editing records If more than one user simultaneously edits a record, MP2 only accepts the changes from the record that is posted to the database first. When another user tries to post changes to the same record after another user has already posted it, MP2 displays a message that another user has already changed the record.!

User passwords prevent unauthorized users from logging into MP2. Each MP2 user specifies a user password. Server passwords prevent unauthorized users from connecting to the database system that stores MP2s data tables. MP2 permits one user password per user and only one server password per system. Change the server password to ensure data security.
