Peace War And Computers - delapac.com

Cyberwarfare is the use of technology to attack a nation, causing comparable harm to actual warfare. There is significant debate among experts regarding the definition of cyberwarfare, and even if such a thing exists. One view is that the term 'cyberwarfare' is a misnomer, since no offensive cyber actions to date could be described as 'war'.

War and Peace

World War II was the first war in history in which the weapons in use at the end of the war differed significantly from those employed at the outset. The atomic bomb is the most obvious example, but the list of military technologies introduced between 1939 and 1945 includes as well jet aircraft, guided missiles, microwave radar, and the proximity fuse, to name just a few.
