Star Photography. My favorite type of personal photography is taking night shots of the stars (long exposure pictures). I am often busy shooting pictures of people at weddings, or apartments, or models, and it's important for me to make sure I take pictures for fun regularly. Taking pictures for no one other than myself is highly rewarding, soul filling, and fun!

Since January 2009 Canon U.S.A. selected Jennifer to be one of the world's 36 best photographers for the Explorer Of Light program, an elite group of internationally recognised photographers. Jennifer is the co-author and photographer of the book, *Photography Night Sky: A Field Guide to Shooting After Dark* (2014, Mountaineers Books).

Photography Night Sky: A Field Guide for Shooting after ...

Although sunset photos are attention-getters, you and your digital SLR can get great shots of the night sky after the sun goes down. The trick is to find a great spot with next to no ambient light from cities. And, unless you're in a tropical paradise, the lower-humidity of the fall and winter makes for []

How to Shoot the Night Sky
(Introduction to Astrophotography)

I really enjoy raptor photography, definitely much more than any other type of bird photography. Birds of prey are powerful, aggressive, fast, agile, precise and even at times ravenous, having no mercy on their targets. They are also tough to photograph and get close to, since most of them (especially adults) do not like people and their presence.
