This free plumbing practice test will give you an idea of the types of questions that appear on actual plumbing licensing exams. Plumbing exams vary by state but most all states and local plumbing jurisdictions have adopted either the IPC or the UPC plumbing codes.

Plumbing Practice Test (2020 Current) - Tests.com
A pipe is considered as a pressure tight cylinder which is used to convey fluids under pressure through materials of commercially available designation. A pipe is a tubular section or hollow cylinder, usually but not necessarily of circular cross-section, used mainly to convey substances which can flow — liquids and gases (fluids), slurries, powders, masses of small solids.
