In this final part (sorry for the delay) I'm going to cover how you should approach choosing your Realtime Web App Tech Stack. Socket.IO has done an amazing job when it comes to making people aware of realtime web technology. And it's a great solution. But, it shouldn't be the default choice when choosing your realtime web solution.

**Choosing your Realtime Web App Tech Stack - Phil Leggetter ...**

The command above is simply sending a Realtime message to your private channel (the C parameter) using the Realtime REST API. The Realtime server will take care of broadcasting it to Firebase Cloud Messaging for delivery. One push, many platforms. But the good news won't stop here.
