### S4 Rescue SART Safety Marine

The S4 Rescue Radar SART is a 9GHz X-band radar transponder which offers proven reliability. Extremely simple to use, the S4 Rescue can be operated even with gloved or wet hands. Its compact design makes it suitable for packing in liferafts or as a carry off device.

### S4 Rescue SART – Marine Consultants Limited

A Search And Rescue Transponder (SART) is a Radar based emergency transmitter that is designed to be stored in a liferaft or as a carry on device in the event that it is necessary to abandon ship. When it detects an incoming X-band radar pulse from another vessel or aircraft it automatically transmits a response signal, which appears on the vessel's radar display as a series of 12 dots ...

### McMurdo S4 Rescue SART – Orolia Maritime

The brand originated in the 1940's, and since that date has been involved in designing and manufacturing marine safety products. The first McMurdo COSPAS-SARSAT approved EPIRB was produced in 1989, and McMurdo further galvanised its position as a leading brand in safety equipment technology in 1992, with the release of the first McMurdo

Operation of marine radar for SART detection Radar Range Scale When  
looking for a SART it is preferable to use a range scale between 6 and  
12 nautical miles. This is because the spacing between the SART  
responses is about 0.6 nautical miles (1125 metres) and it is  
necessary to see a number of responses to distinguish the SART from

Rugged McMurdo S4 Rescue SART is buoyant and waterproof to a depth of 10m. When it detects a radar signal from another vessel or aircraft, the S4 Rescue SART's 9GHz X-band Radar transceiver will automatically transmit a response signal which will appear on the other vessel's radar display as a series of 12 dots, pinpointing your location.

McMurdo S4 Rescue SART - F&C Marine Limited

The Search and Rescue Transponder incorporates both a radio receiver and a transmitter tuned to the frequency of marine navigation radar. When the SART is interrogated (swept) by a radar beam the SART receiver picks up that signal and responds by generating and transmitting (12) amplified signals with only micro seconds delay between each.
