SS Great Britain is a museum ship and former passenger steamship, which was advanced for her time. She was the longest passenger ship in the world from 1845 to 1854. She was designed by Isambard Kingdom Brunel (1806–1859), for the Great Western Steamship Company's transatlantic service between Bristol and New York. While other ships had been built of iron or equipped with a screw propeller ...

United Kingdom (1843) Brunel's industrial age marvel SS Great Britain was one of the most famous ships in history. It was the first all-iron large oceanic liner, although not truly the first screw steamer: The "prototype" was indeed the little HMS Archimedes, developed around the idea of the original screw of archimedes. It was launched ...

A visit to one of Brunel's most famous inventions, the SS Great Britain! Built in 1843, the SS Great Britain travelled the world, first as a passenger ship and later as a cargo ship before finally being scuttled off the Falklands in 1937. After an amazing 33 years, this beautiful boat was finally returned to Bristol, to the very same dry dock in which she was built!

## **SS Great Britain | International House Bristol**

When she was launched on 19 July 1843, she was the largest ship in the world and the first ocean going iron-hulled, propeller driven steamship. After sailing more than 1,000,000 nautical miles, she spent over 80 years in the Falkland Islands. In 1970 the SS Great Britain was returned to Bristol and the same dry dock where she was built. The ...

SS Leviathan, originally built as Vaterland (meaning "Fatherland" in German), was an ocean liner which regularly crossed the North Atlantic from 1914 to 1934. The second of three sister ships built for Germany's Hamburg America Line for their transatlantic passenger service, she sailed as Vaterland for less than a year before her early career was halted by the start of World War I.
