It got wide coverage worldwide and was reported by National Geographic, Science News, ABC, CBS, Fox, CNN, USA Today, The Sun, and ...

#### Amphibian & Reptile Conservation

It should be noted that a handful of reptile and amphibian species do not lay eggs, but have live birth. Reptiles typically use internal mating mechanisms that are somewhat similar to those used by mammals. Amphibians usually mate externally, meaning that the female first lays her eggs in a large clutch, and the male then fertilizes them where they lay.

#### What is the Difference Between a Reptile and an Amphibian?

Reptiles belong to the class Reptilia while amphibians belong to the class Amphibia. There is a difference between amphibians and reptiles, but they are also similar. They are both ectotherms, often have similar diets and have similar body forms.
