The future of work: jobs and skills in 2030

In the last four months, work has changed drastically. But will these changes persist into the future? Our second Work Trend Index report explores this idea by combining insights from three sources: trends behind how our customers use our tools; findings from a Harris Poll survey of over 2,000 remote workers in six countries 1; and conclusions from over 30 research projects from across ...

The future of work—the good, the challenging & the unknown ...

Future of Work Disruption lies ahead. Driven by accelerating connectivity, new talent models, and cognitive tools, work is changing. As robotics, AI, the gig economy and crowds grow, jobs are being reinvented, creating the “augmented workforce.” We must reconsider how jobs are designed and work to adapt and learn for future growth.

Work of the Future Report The MIT Task Force on the Work of the Future launched in 2018 as an institute-wide initiative to understand how emerging technologies are changing the nature of human work and the skills required—and how we can design and leverage technological innovations for the benefit of everyone in society.

Homepage - MIT Work of the Future

Though the future of work will always be in the future, the future of your work has never been closer. The rise of robots, machine intelligence, distributed ledgers, quantum physics, “gig” labor, the unexaggerated death of privacy, a world eaten alive by software—all these trends point to a new world that’s shaping up quite differently from anything we’ve ever seen, or worked in, before.
