The Objective Caml system, release 3.11 ... - CORE

OCaml (/oʔkæm?l/oh-KAM-?l) (formerly Objective Caml) is the main implementation of the Caml programming language, created in 1996 by Xavier Leroy, Jérôme Vouillon, Damien Doligez, Didier Rémy, Ascánder Suárez, and others. It extends Caml with object-oriented features, and is a member of the ML family.

OCaml - OCaml

Objective Caml. This design was integrated and implemented within Caml Special Light, leading to the Objective Caml language and implementation, first released in 1996 and renamed to OCaml in 2011. Objective Caml was the first language to combine the full power of object-oriented programming with ML-style static typing and type inference.
