The Origin of Our Species. Hosted by the Australian Centre for Ancient DNA, the Environment Institute, the University of Adelaide and the South Australian Museum. Guest Speaker - Professor Chris Stringer

The Origin of Our Species | Environment Institute

On the Origin of Species England became quieter and more prosperous in the 1850s, and by mid-decade the professionals were taking over, instituting exams and establishing a meritocracy. The changing social composition of science—typified by the rise of the freethinking biologist Thomas Henry Huxley —promised a better reception for Darwin.
