The Value Chain Map Ser

Introduction It is recommended that value chain mapping be conducted in two phases; a) an initial basic map after the collection of initial data illustrating participants and functions, and b) adjusted mapping, which is conducted following additional and follow-on interviews.

3.2.5. Value Chain Mapping Process | Marketlinks

A Value Chain Map is a high-level process map or value stream map: the term value chain coming from the strategy literature - Michael Porter. I prefer the term value chain because it reminds me that we are trying to link operations to strategy. But any other term is acceptable, so long as the tool does the same thing.

What a Value Chain Map is | Stratex hub

Value stream maps show the flow of both materials and information as they progress through the process. The difference between a value stream and a value chain is that a value stream focuses only on areas of a firm that add value to a product or service, whereas a value chain refers to all of the activities within a company.
