Especially citizens of 3rd world countries will have trouble going to the Western World. Some island countries may even go so far that they will limit all travel except air travel, as it is easier to control. The world will not get any safer and countries will have to take radical actions to keep unwanted people away.

How the world will look like in 2050? - By

This is what Earth will look like in 100 years — if we're lucky. But in case you're unaware: It's really, really hot. In fact, 2016 is likely to be the hottest year on record, increasing 2.3 degrees Fahrenheit (1.3 degrees Celsius) above preindustrial averages. That brings us dangerously close to the 2.7-degree-Fahrenheit (1.5-degree-Celsius) limit set by international policymakers for global warming.

This Is What Earth Will Look Like in 100 Years

Here's What Earth Would Look Like If All The Ice Melted. The upper range of the ice sheet's stability is somewhere between 500 ppm to near 800 ppm CO2. At that point the Earth is on a path to being ice free for thousands of years. One upside is that while we may get to the 500 ppm tipping point in the next century...
