For Zend Framework applications, the controller system is based

## Download Ebook Zend Framework In Action

on the design pattern known as Front Controller which uses a handler (`Zend_Controller_Front`) and action commands (`Zend_Controller_Action`) which work together in tandem.

Zend Framework In Action - SlideShare

For action and view helpers, the default prefix is "Zend\_Controller\_Action" or "Zend\_View\_Helper", so I would argue that these particular cases are different. It would be helpful if the defaults were `App_View_Helper` or `My_View_Helper` though as it would establish the convention for the name of the folder that lives in library that is used for ZF overrides.

Using Action Helpers in Zend Framework – Rob Allen's DevNotes

## Download Ebook Zend Framework In Action

Action Helpers aim to minimize the necessity to extend the abstract Action Controller in order to inject common Action Controller functionality. There are a number of ways to use Action Helpers. Action Helpers employ the use of a brokerage system, similar to the types of brokerage you see in `Zend_View_Helper` , and that of `Zend_Controller_Plugin` .

Zend Framework in Action Errata – Rob Allen's DevNotes

Zend Framework (ZF) is an open source, object-oriented web application framework implemented in PHP 7 and licensed under the New BSD License. The framework is basically a collection of professional PHP-based packages. The framework uses various packages by the use of Composer as part of its package dependency managers; some of them are PHPUnit for testing all packages, Travis CI for continuous ...

The book MIGHT be useful if you have already done a few projects with zend framework. however zend's documents would be more useful then. I guess you will learn easier and faster by those simple tutorials on the net (like Getting Started tutorial of zend or some beginner videos on the net). After that Framework documentation would be enough.
