**Teaching and Researching: Speaking** Rebecca Hughes  
2013-11-04 Speaking is a dynamic, interpersonal process and one that strongly influences how we are perceived by others in a range of formal and everyday contexts. Despite this, speaking is often researched and taught as if it is simply writing delivered in a different mode. In *Teaching and Researching Speaking*, Rebecca Hughes suggests that we have less understanding than we might of important meaning-making aspects of speech such as prosody, gaze, affect, and the ways speakers collaborate and negotiate with one another in interaction. This thoroughly revised and updated second edition looks to the future of the field, offering: A new chapter on assessment, discussing 'high stakes' oral language testing contexts such as immigration New material considering access to spoken data via the worldwide web and new technologies that allow neurolinguistic insights formerly hidden from view Summaries and case studies to help the reader understand how to approach researching speaking and encourages practitioners to question the models of speaking that they are using in their classrooms. Reviewing materials and assessment practices in the light of current knowledge about spoken language, and highlighting areas for new work and collaboration between researchers and practitioners, this book will be a valuable resource for anyone involved in language

teaching.

**Observation in the Language Classroom** Dick Allwright

2014-09-25 This book provides an account of classroom observation in a historical and educational perspective. Drawing on extracts from classic studies in this field, Dick Allwright reviews the development of research and experiment since the 1970's. The book thus not only provides a background to recent research, but also identifies areas for future development. Stress is laid on the link to be made between practice and research and it is argued that policy-making, either at classroom or institutional level, is heavily dependent on descriptive accounts of classroom reality.
